

## Notes:

- 1. Material is good quality 1/4" Baltic birch plywood or similar material to reduce splintering on edges and surface.
- ? Most dimensions are not critical. However, dimensions between holes should be as accurate as possible to facilitate mounting to trike frame
- Ś Some method should be used to eliminate sharp edges on upper seat surfaces. require this treatment. which should be radiused at the edges. The bottom surface does not necessarily Note that the upper surface (facing the viewer in the drawing above) is the surface Edge sanding, a slight 1/8", 1/16" or smaller radius or other methods may be used.
