

## Notes:

- 1. Material is good quality 1/2" Baltic birch plywood or similar material to reduce splintering on edges and surface.
- 5 should be as accurate as possible to facilitate mounting to trike frame Most dimensions are not critical. However, dimensions between holes
- Ś require this treatment. which should be radiused at the edges. The bottom surface does not necessarily Note that the upper surface (facing the viewer in the drawing above) is the surface Some method should be used to eliminate sharp edges on upper seat surfaces. Edge sanding, a slight 1/8", 1/16" or smaller radius or other methods may be used.

HWI Dual Offset Tube Trike (DOTT-C) Foot Rest Plywood Surface Standard & Compact Versions
